PROFILE

Proficient developer with solid experience in software engineering and a strong passion for developing quality solutions that add value.

PROFESSIONAL EXPERIENCE

Full-stack Developer
Pearmonie LLC

Jan 2025 – present
Lagos, Nigeria
Remote

- Worked on a new web app as an alternative to the existing mobile app. This directly led to an increase in the conversion rate of the sales team by over 60%.
- Built a robust theme editor, implemented three new themes, and revamped existing themes for the no-code store, leading to over a 300% increase in usage of the no-code store feature.
- Fixed critical bugs and implemented new feature requests on the mobile app.

Software Engineer
AreaBox Co.

Mar 2024 – Aug 2025
Michigan, USA
Remote

- Built a robust authentication system and worked with the Celo blockchain to build a secure and scalable blockchain wallet service with interoperability with fiat currencies.
- Designed and implemented a fast and efficient notification system for events across the app, including live chat, invites, and wallet transactions.
- Reduced monthly server costs by 50% and increased overall runtime efficiency by setting up and configuring a new Linux server for running several microservices.

Associate Software Engineer
Hux Ventures

Aug 2022 – Apr 2024
Lagos, Nigeria
Hybrid

- Led the development of a global course search application.
- Developed and managed PHP and WordPress sites for various portfolio companies, tailoring each site to meet organization and branding requirements.
- Oversaw Linux server administration and deployment processes across all dev teams, ensuring operational efficiency and overall stability of applications.

Back-end Developer (Professional Freelancer)
Ports, PlatON Network, Vidly

May 2021 – Jul 2022
Lagos, Nigeria
Remote

- Developed the subscription service for a scheduling app, including payment integration.
- Worked on the backend service and wrote documentation for PlatON Network's social network service.
- Worked on the backend of a movie-rental app and wrote backend tests.

SKILLS

Languages and Databases
Python, JavaScript, TypeScript, PHP, Dart, Bash, PostgreSQL, MySQL, MongoDB
